Essential Light Pad System Brochure

Essential Light Overview

Essential Light is an industry leader in the revolutionary full body red light therapy treatment systems. We specialize in sales, marketing, and distribution of red light therapy for the treatment and management of fat reduction, skin rejuvenation, and whole-body healing in general.

Our device has benefitted all types of health professionals and wellness institutions who wish to enhance their offerings with red light therapy. We have spent thousands of hours researching, testing, and perfecting our product for results that are unmatched by any other red light therapy device on the market. Our approach and commitment are to develop highly effective, innovative, and exceptional products for all our customers and their patient's wellness needs.

Red Light Therapy

Red Light Therapy is a therapeutic technology that uses red and near infrared wavelengths of light to naturally stimulate the body (at the cellular level) to produce more ATP (energy). This increased production is a significant component of cellular regeneration which is responsible for improving and boosting new cell growth. It's been proven that this biochemical reaction results in a multitude of health benefits. These include weight loss and improved cellulite reduction, as well as enhanced whole body healing capabilities, and anti-aging effects.

Skin Benefits

Red light technology is made up of powerful and concentrated red and near-infrared wavelengths that penetrate and stimulate the skin at the cellular level. It's extremely effective for boosting intradermal collagen production which results in the following all natural outcomes with no pain, side effects or downtime.

- Reduced fine lines and wrinkles
- Reduced inflammation
- Reduced redness and pigmentation
- Reduced acne breakouts

Weight Loss Benefits

Naturally slim, shape and tone the body. Clinical research indicates Red Light Therapy helps with weight management including cellulite reduction, by reducing and shrinking fat cells, easily and naturally. No cells or tissues are damaged or destroyed during a treatment.

Unlike other solutions that require medication or surgery, Red Light Therapy is a safe and drug-free, non-invasive solution for your patients to lose weight.

The Essential Red Light Therapy Pad System

The Essential Light Therapy Pad System only requires 20 to 30 minute sessions. With twice the power than most red light systems on the market, our device produces rapid fat loss and pain reduction in minimal time.

We can help you produce incredible weight loss, anti-aging, and healing results both safely and easily for your patients.

The Essential Light package will provide your facility with everything it needs to get you started educating and treating your patients with red light therapy. We partner with you to help build and grow your business to generate more income than you ever imagined. We want to help you empower your patients to look, feel, and function better.

How Essential Light Therapy Works

Photobiomodulation: (PBM Therapy)

Previously known as Low Level Laser Therapy (LLLT) is the application of red and near infra-red light over injuries or lesions to improve wound and soft tissue healing, reduce inflammation and give relief for both acute and chronic pain.

What's so Special About Essential Light?

“No other device comes close to the effectiveness of the Essential Light.”

Flexibility:

The more flexible the pads are... the more curves can be treated. No pad system is more flexible than the Essential Light System.

Not Lasers... Not Paddles:

The Essential Light system is made up of over 10,000 powerful "high intensity" LEDs. The System includes a face mask, chin pad, and 6 large, sturdy and flexible pads all of which can easily cover all priority regions at once. And the setup takes less than a minute.

Safer To Use:

The current advancements of the Essential Light System creates tissue coverage and penetration of the light that is superior to other LED devices as well as low level lasers, without the risks. Any trained staff member can administer the treatment.

Multiport Controller:

The controller allows you to use the six body pads, chin pad, and face mask all at same time. This allows you to thoroughly treat up to ten regions including the abdomen, buttocks, thighs, arms, bra fat area, jowls, chin fat region, and face in a single session.

More Flexible Pads and User Friendly:

Our soft, highly flexible pads are easy to wrap around any part of the body.

With eight connector ports, and an easy-to-operate touch screen controller, anyone can master the Essential Light Therapy device within minutes.

Easy to Clean:

Our Essential Light pads require less cleaning than our competitors to remain 100% sanitary, allowing less time between appointments.

Testimonies

Joseph – Weight Loss

“I just completed my first Essential Light Therapy session 2 days ago. My main concern when I started was my belly fat. After about a week and a half I started to notice that my belly started to seem flatter, and my pants seem to fit looser. I have tried everything in the past including hitting the gym and dieting... but nothing really worked for me. Essential Light Therapy had made it possible for me to lose the weight I needed to lose.”

Nicole – Anti-Aging

“I have been struggling quite a bit with getting older and the changes I have been noticing on my face. I wasn’t ready for a facelift, and I wanted something less invasive. I tried all sorts of creams and serums, and they just weren’t doing the trick. I discovered Red Light Therapy through a friend and figured I would give it a try. WOW was I surprised by the results. After just a handful of sessions I was seeing incredible results with my fine lines and wrinkles as well as my sunspots. My skin was softer, smoother, and firmer. I could not believe how my skin was responding. Thank you to my friend Anna who introduced me to this life changing treatment. What a wonderful discovery.”

Mary - Healing

“I recently had an eye lift. However, I looked like a monster after the procedure. I was swollen, bruised and my incisions were bright red. I used the Essential Light Therapy Bed a few days after, and I immediately could see a huge difference after just a few sessions. The redness had calmed down tremendously, the bruising was almost gone, and the swelling was minimal. My plastic surgeon was amazed at how quickly and nicely I was healing. She said she had never seen an eye lift heal so fast. Even my friends and family were in shock. Now, I have no scars and my eyes look better than I thought they would. Thank you, red light therapy!”
